

# Ivy Hotel

Baltimore, MD

The Ivy Hotel is a luxury boutique hotel located in the heart of downtown Baltimore, in the building formerly known as The Inn at Government House. This 19<sup>th</sup> century mansion provides the atmosphere of being in the comfort of your own home. The eighteen rooms are all uniquely designed with their own fireplace and its own personality. As the electrical subcontractor, TEI played a role in the lighting design, including the installation of a sophisticated complex lighting control package. Our team worked closely with the owners and designers to recess the selected light fixtures within the existing wood frame construction. As a luxurious historical building being renovated in the 21<sup>st</sup> century, modern day technology was installed including Control 4, an integrating system that allows the owners to control everything from lighting, music, curtains and much more with just one touch of a button.
