

Sport & Health

Rockville, MD

GC: Hubert Construction

Start: April, 2014

Completed: February, 2015

TEI
5728 Industry Lane
Frederick, MD 21704

With the success that Sport & Health has achieved and the demand from their clients, reaching a larger segmentation of clients and spreading the importance of health has always been key. TEI was fortunate to be part of the vision of Sport & Health for their new club located in the heart of Rockville Maryland. In April of 2014 Hubert Construction, who was awarded the general construction contract to build this new club, brought in TEI Construction as the electrical contractor. TEI was responsible for the complete electrical distribution for the entire facility. The scope of work included: power distribution, fire alarm system, conduit for the sound system raceways, lighting and lighting control. The low voltage wiring that we installed consisted of the installation of networking and communication cabling, allowing their phone and internet to function properly. The cabling and wiring for the TV's that are throughout the building were also installed by our skilled low voltage technicians. We understood the clients needs and vision as we constructed this facility due to the experience we gained from the other gyms that we have completed. Being able to bring our clients vision to life is what we strive for here at TEI.
